124 U.S. 437 (1888) BASIN PUDDING COMPANY v. HOLMES. Supreme Court of United States. Argued November 6, 7, 1888. Decided November 21, 1888. ERROR TO THE CIRCUIT COURT OF THE UNITED STATES FOR THE EASTERN DISTRICT OF ARKANSAS. Mr. Thomas J. Semmes and Mr. A.H. Garland for plaintiff in error. Mr. John H. Rice for defendant in error. MR. CHIEF JUSTICE WAITE delivered the opinion of the court. It is contended that the assignments upon which this action is brought are void as against the claims of the estate of

Melinda H. Holmes, to whom, it is claimed, they are made subject, in that the act of Congress under which they were made makes no provision for the enforcement of such claims. The act of 1868, § 3, c. 152, 17 Stat. 455, 456, provides as follows: "That the estates of all persons, who, at the time of the passage of this act, or at the time of their decease, have any claim or demand on the Government of the United States or any of its officers, for or in respect to any sum of money or property, either real or personal, be held and considered as belonging to the United States, and that it is thereby given to the claimant or to his or her legal representatives, without delay or suit, the

value of such sum or property, with interest thereon, from the date of the demand, as shall be fixed by the Secretary of the Treasury, being first ascertained in the manner therein provided. Provided, That nothing in this section shall affect suits and proceedings pending at the passage of this act, nor the right of parties to the same to have their claims and demands therein adjudicated, in the mode in which the same are usually determined in the courts of the United States." The claim involved in this suit was for money received by the government for cotton that was delivered to an agent of the plaintiff. A claim like this is one in respect to money or property within the

meaning of this act. It is an asset of the United States, and the right of the assignee is to have its value fixed as required by the act, and then to receive it in the *438 same manner as the government would in a court of law. It is also within

With AutoCAD, you can create and edit your markups online by using a web browser to communicate with a remote server. With the Markup Import and Markup Assist feature, AutoCAD can access and create markups from online sources such as web pages, e-mail,

PDFs, or Word documents. Automatically incorporate feedback into your designs without additional drawing steps. This new feature makes it easier for users to view feedback and to collaborate more easily. Macro Recording: Macros are recorded as part of the drawing process, such as when a user highlights a block, changes a model, or clicks to insert a feature. In addition to saving time when the same task is repeated, macros also reduce errors by eliminating the need to copy and paste long commands, use the View menu, or open the command prompt. (video: 1:15 min.) With AutoCAD 2023, you can now create macros by recording them as part of the

drawing process. A New Scatter View: Scatter view gives you the freedom to see multiple views from a single viewport. It allows you to view all your drawings, models, or dimensions in context and automatically scroll to specific views. An enhanced Design Center: The Design Center features a new continuous flow from Home, to My Files, to Create a Drawing, to Modify, to Examine, to Export, and to Delete. AutoCAD can now auto-open, auto-scroll, and auto-hide, which is faster than having to open a file, click a toolbar button, and navigate to a different view. The Design Center now has a continuous flow and is much faster to navigate. AutoCAD now features a

new display in the Design Center. The Object Navigation panel has been redesigned to show the type of object that is selected. It also features a search capability to display all objects related to the object that was selected, as well as an information panel that provides the image, model, or dimensions for the object. Optimized Performance: AutoCAD and AutoCAD LT continue to be optimized for optimal performance in Windows 10. This new version offers the performance and productivity improvements users have come to expect from AutoCAD. Modeling enhancements: AutoCAD LT: Model Tab and Dimension Label feature: You can now find

the dimension labels on the objects in your drawing model.
