References Category:Windows components Category:Authentication methodsQ: Cannot deserialize object of type java.util.ArrayList from input I am trying to deserialize below json into POJO class with Gson. The problem is that the class this code resides in is: public class Curriculum { @JacksonProperty(localName = "items", description = "The skill areas in which students demonstrate their interest.", isList = true, propertyVisibility = Visibility.PUBLIC) @JsonProperty("items") private List items; } And my POJO class has below: private List items; public List getItems() { return items; } public Curriculum withItems(List items) { this.items = items; return this; } public Curriculum withItems(List items) { this.items = items; return this; } public void setItems(List items) { this.items = items; } public Curriculum withItems(List items) { this.items = items; return this; } And my json is as follows: { "items": ["Maths", "Software Engg", "C++", "Java", "C"] } At first I had @JsonProperty(localName = "items", description = "The skill areas in which students demonstrate their interest.", 3da54e8ca3
