## What's New In?

* Acquire and recover your lost data files. File Recovery Wizard is a professional and easy-to-use tool that can help users recover their lost data files. This powerful data recovery tool provides two modes: Recovery Wizard and Optimize Mode. The Recovery Wizard can analyze each file and recover the lost data one by one, while the Optimize Mode could help users recover all files with corrupted file names without creating any file on the local drive. It has a large database of file samples and has the ability to recover data from damaged, missing and corrupted files. It can effectively recover data from FAT12, FAT16, FAT32, NTFS, exFAT, FDISK, VFAT, UDF, HFS, HFS+ and NTFS partitions. With its powerful algorithms, this data recovery tool can help you recover both small and large-size files even if the size of the lost files exceeds 128 MB. The most important feature of this tool is its intuitive interface, which makes its usage even more simple. Users only need to input their file names and the software will search and instantly recover all lost files. In addition, a preview function is included so that the missing files can be previewed without affecting the main system. * Move files from one location to another. File Copier is a must-have tool for daily computer users because it helps users transfer files, folders and storage spaces from one place to another. It is very easy to use: users only need to choose a drive or folder, then choose the original and the destination of the files and then click the Copy button. The advanced version of File Copier allows users to specify the original and destination folders and the destination location and size. It also enables users to search the target drive or folder and then copy only files that contain a certain string or a regular expression. This file transfer tool is not only able to move files, but also can save your time and effort in doing so. * Quickly search large volume of files. This search tool can search the data of a selected file and then

display them in order by date last modified, size, type, etc. Using this tool, users can search the most important documents and important media files in a fast way. This application is a must-have utility for all computer users. * Find and replace text strings in selected files. Besides its ability to locate text strings in files, this text search tool can help users replace them with other specified strings

## System Requirements:
