AutoCAD is used for 2D and 3D drafting. A powerful 2D CAD tool, AutoCAD is also the industry standard for 3D software. Unlike software such as SolidWorks or Inventor, which require professional CAD users, AutoCAD is used by architects, engineers, and designers of all kinds. AutoCAD's popularity is based on its user-friendly interface and the tools it offers for freehand drawing and engineering. The ease of AutoCAD makes it easy to learn and to adopt. By allowing you to quickly create models, AutoCAD has provided a means of drafting architecture, engineering, or construction projects at a level and on a scale never before possible. User-friendly AutoCAD is easy to use. With an easy-to-follow step-by-step interface, AutoCAD can be used by beginners and experts alike. Unlike

other CAD applications that require coding and programming, AutoCAD is preconfigured to be run as a standard graphic user interface (GUI). This is also the case with many other popular applications, such as Microsoft Excel and Adobe Photoshop, so beginners can get started easily. AutoCAD is also good for students and individuals with a non-traditional education. For the past 40 years, AutoCAD has been available to students for free. Now anyone can learn and get started easily by purchasing the software at a reasonable cost. AutoCAD provides unlimited access to training videos, and new training features are released regularly. Pricing and types of AutoCAD licenses AutoCAD provides a comprehensive suite of CAD tools for modeling and designing projects. In addition to the AutoCAD Drawing and Freehand drafting tools, AutoCAD has a full set of tools for engineering and design.

There are two types of AutoCAD licenses. In addition to the standard license, which is a lifetime license, there is also the AutoCAD Student Subscription. The AutoCAD Student Subscription is a subscription service offered at a reduced price. AutoCAD Enterprise AutoCAD Enterprise is an enterprise software that includes all the standard AutoCAD tools. The features of AutoCAD Enterprise include: Plan view Drafting Data management Plotter Import/export (batch) Routing (Raptor) Dynamically linked database (DDL) GIS

16 people get COVID-19 in Kolkata, two die
Sixteen people tested positive for COVID-19 in Kolkata and two of them have died, the Kolkata Municipal Corporation (KMC) said on Wednesday. Of the 16 patients, seven have been discharged and nine are undergoing treatment in the city. "Sixteen people have been found to be positive for coronavirus. Two of them, an 18-year-old male and a 63-year-old male, died," said KMC Chief Medical Officer Gautam Das. He said the patients have been identified and are being discharged from the isolation wards at the KMC's public health centres. The positive cases include 12 men and four women. Among those, four are students, while the rest are office-bearers in a company or their

relatives. "All the patients are suffering from mild flu symptoms. They are suffering from runny nose, low fever and cough. They are getting good care in the isolation wards," said a KMC official. Rashid, who goes to the NGO-run 'Aar-e-Hidayah' Centre for coronavirus patients, said the hospital was treating a few patients from the city on its own. "

What's New in the AutoCAD?

When drawing arrows, you can pick a point within the arrow. This point acts as a reference point for the arrow, so that changes in the placement of the arrow affect only the arrow, not the other parts of the drawing. (video: 1:38 min.) Drawing symbols and creating splines in the drawing or model pane is now much easier. Press Ctrl+R or click the New Symbol button to quickly create a spline or symbol. Linework additions

and improvements: Support for textured meshes: If you import a standard.stl file that contains textures, you can also add textured meshes. Add textured meshes and quickly apply them to the imported object. Live Linking: When you move a polyline or spline in the model pane or viewing pane, other objects that reference that linework are automatically updated. (video: 1:15 min.) Snap to Edge: Line and curve intersections of different line styles and line weights are snapped to the same point, based on the type of line. Editable text: Use the text editing tool to quickly change text properties, such as the text size, text color, and text layer. Spline editing: Modify an existing spline by selecting two anchor points and dragging to connect them. The solid symbol button lets you quickly create solid objects. The new solid symbol button is on the Insert tab, next to the new spline button. (video: 1:44 min.)

More control in model-space drawing: Select the Pick Shape tool, double-click to start the 3D window, and select a part of the drawing to be edited. Drawing table additions and improvements: When you work with shapes and text, you can quickly create a drawing table, by pressing the Spacebar, then typing the letter “d.” You can then move the table as a group. Drawing labels are now automatically updated when you adjust the properties of the table. The text background feature now applies to labels. Use this feature to change the color of the background, the label’s text and the text’s color, and the text’s foreground and background colors. (video: 1:48 min.) The Bevel feature is available in drawing table labels. When you select the Bevel effect and select the arrow head type for the
