Orleans: a game from Stargleet, the same team behind Darwinia. Play the standard single-player campaign to play as one of four unique mercenaries that are offered as part of the game. The campaign isn't a typical RPG-style affair, and contains a mix of strategy, action, and RPG elements. Each of these mercenaries can be customized in three major aspects - physical attributes, weaponry, and equipment. The gameplay itself is quite simple - you move your character around by pushing, turning and walking. There are also opportunities to throw grenades, shoot with weapons, and activate certain skills. Combat is simple as well - most enemies you encounter will just stand there and be dispatched by your deadly firepower. They don't move, they don't try to run away. Just like the town in Darwinia, you'll find more than enough items to keep you busy. When you're fighting your enemies or mining for resources, you'll earn Experience Points. Whenever you spend all of your Experience Points in the current level, you gain a level. Thus, leveling up actually involves mining and collecting resources, since you won't be able to progress further in the current level until you've gathered enough Experience Points. When you're dead, you stay dead. There's no revival in this game - dying in combat will send you back to the very beginning of the level. Dice Rulers is a competitive skill game. It was developed by All Skyfall and is currently a free-to-play mobile game. In this game, you try to become the most valuable player by completing different levels. You can win in two ways: through skill, or by winning in your matchmaking games. download Avalanche Case FreeMMORPG.Com Offers Games News, Download Free MMORPG Games, Game Walkthroughs, MMORPG Game Tips, and More!
