Steve Nicol and David James share their thoughts on new mode modes HyperMotion Technology has been created using a new proprietary data collection methodology, by combining motion capture data with video and audio data. The data is captured during a real-life match and processed to create accurate and fluid movement and game replays, including Player Impact Indicators, Player Impact Visuals and Moments, which highlight key actions and highlights from the match. For more information on the features and enhancements of HyperMotion Technology, along with an in-depth look at the gaming-specific data and insights delivered by this new technology, please download the linked files below: Full Feature Description: HyperMotion Technology: Combining real-life match data with video and audio collected in motion capture suits, HyperMotion Technology is the secret sauce that powers new gameplay features in FIFA 22. Below you can find a complete description of HyperMotion Technology features, along with step-by-step explanations of these exciting new gameplay options. HyperMotion Technology: Insights In order to highlight the unique information delivered by the new technology, we have created a special gameplay feature, titled “HyperMotion Technology: Insights.” This feature pulls together the data that’s captured during the real-life matches, is then translated into FIFA 22 game play, and presented through a "Sports Scoreboard" graphic in the form of an infographic. In this feature, we will delve into the key pieces of information that make this new technology so exciting for FIFA 22. Enjoy! [Download Infographic] [Download Article] [Download Hybrid] [Download Hybrid] Player Impact Indicator (PII) Trusted gameplay We have invested a lot of time in technology and gameplay testing to ensure that the game is playable and fun the same way for everyone. That said, there will be people who will not enjoy the game. To help identify these players, we have created a new feature in the game, titled “Player Impact Indicator (PII).” PII’s are created by taking a player’s heading, shooting accuracy, ball control, and dribbling ability and comparing that data to the player’s historical PII data. This will

FIFA (from the English football association, not the soap opera) is arguably the best-selling videogame franchise of all time, and this year EA returns to its roots as it makes the leap to consoles. FIFA 22 brings the game up to the real thing with fundamental gameplay advances and a new season of innovation across every mode, including the first FIFA World Cup™ ever. EA SPORTS FIFA 22 offers new ways to control and enjoy football, including the use of your controller's vibration to announce your favourite team's new signings and new power of lightning shots, such as those that automatically pass through the keeper at a flick of a switch. Powered by Football™ Every single touch in FIFA 22 is fully powered by new in-game physics engine, known as "Powered by Football". Key features include improved acceleration and first-person ball animations that work seamlessly together. Fans can choose from 30 playing styles, including off-the-ball moves that have been improved and new ways to control the ball. FIFA 22 also features a new goal celebration system that lets you shout out "MVP!" to acknowledge your teammates' great plays. Reach out and touch your friends Available on both console and PC, EA SPORTS FIFA 22 introduces a slew of new features to become the best place for players to connect and compete with each other. From becoming a better manager by gaining insights from your rival teams' strengths and weaknesses to taking your online career all the way to the very top, FIFA is the ultimate way to find your people in the most immersive world of football ever created. FIFA Ultimate Team For the first time ever in FIFA, a single-player mode lets you go up against other managers to see who really knows what they're doing. Choose from over 500 licensed players, including legends such as Zinedine Zidane, Ronaldinho, Alan Shearer and more, and then build and take charge of a squad to dominate online gameplay and the league. Then, keep that squad intact and upgrade it with the game's new progression system, The Journey. Powered by the Frostbite Engine The FIFA franchise has been powered by the same technology that brings players's worlds to life for over a decade. The new Frostbite engine allows for an unprecedented level of detail and realism in the game, letting the gameplay come to life with real-world action in up to 4K on PlayStation 4 Pro and Xbox One X. The ability to showcase that
