**MOTION CAPTURE** This technology is based on the Vicon system. More than 30 cameras capture the movements of the players using infrared light. The software receives movement data from the cameras and creates a 3D video of the players based on this data. This data is then compared with authentic play-by-play data. The Vicon system allows the creation of highly accurate 3D models of the players. More than 50 players can be tracked simultaneously. As players move and make challenges on the pitch, their movements are captured and their body shape, position and movement are recreated. **SUIT REQUIREMENTS** The technology is designed to work on top of existing algorithms that are currently used to emulate real-life football gameplay. The motion capture suit has to be worn by the players, who need to run on a variety of surfaces with different conditions. **JACKETS** All players need to wear one of a range of motion capture suits by Vicon (please see below for their range of products). The players also have to wear a shirt to enable movement and make sure players do not move outside the shirt. Team kits are not required. Football boots are not required for matches. **NURSING** Nurses are not allowed to attend matches with spectators. They can, however, attend in a non-intrusive way, for example by providing additional information about medical conditions. **SEATING** Seats are located approximately 40 m behind each goal line. As required, match officials can use suspended partitions, screens or a 'VIP' area near the touchline to control the flow of spectators. The referee can also use a 'Neutral' area to assist him or her in monitoring play. **TECHNICAL** Technical replays are used to verify decisions. The referee can also re-examine a specific play to check decisions. Live VAR is not used. **AUDITING** During matches, an official can attend from the public arena and listen to all VAR decisions. Live VAR can also be accessed using mobile devices. **PITCH AND SWEET POTATO** Offside rule on the ball The offside rule on the ball is the same as before. Indirect free-kicks After the ball enters the goal area, the defending team can

#### What's new in Fifa 22:

- **FIFA 22 introduces "HyperMotion Technology", which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay.**
- **Seamlessly integrate with your favourite live football experience - now players will be able to train or play games with other players you follow on social media through the integration with the new FUT Friend App.**
- **Return to how popular football was between 2010 and 2013 when the game was rereleased in both physical and digital form all over the world in November 2013.**
- **You will join Pro Clubs such as Real Madrid, Bayern Munich, and Chelsea, as well as creating your own bespoke pitch from scratch. You will be able to pick a kit and a theme to choose from and choose your stadium design from too.**
- **Career Mode's player interaction mechanic has been reimagined to see players working together to orchestrate perfect plays in which to score and to create headers and assists for their team mates.**
- **For the first time you'll be able to play cut-scenes from a computer game with other human players before you take on the computer AI in your own FIFA 22 league.**
