: World Tour #1 - The Age of Steam Return to Castle Wolfenstein! 02.24.03: Mosaic Cover done by the diabolical Jack the Ripper. He is my former professor. This is my first cover for the world tour. It's based on the the original "Wolfenstein 3D"es. For more information, visit the Tale of Wolfenstein at CD-Special Edition! In the interest of giving you more of the original game, it is included as a standard on the Brothers Grimm: Tale of Wolfenstein disc. Sadly, there are NO demos or shortcuts. You will have to blaze through most of the game just to get the full experience. Wolfenstein is still a good game, but it just isn't nearly as good as what it could have been. Still, this is a great companion to the original game. You can see the clear difference between the two here: Anamorphic 7.1 Surround Meet the characters. The cover has changed due to the release of the official soundtrack, of which I am the producer. The previous one was an homage to the original "Wolfenstein 3D." If you are looking for Lost Souls and Lost Souls 2, then look no further! Lost Souls is a free scenario that takes place as a sequel to the original "Wolfenstein 3D." And guess what? I wrote it myself! It's available now at I also wrote the map editor, so if you want to make your own maps, you are free to do so at that page. I've been slowly making my way through beating the game. Last night I think I was just above 80% completion of the campaign. Honestly, it's nothing special to say, but I have NOT seen an enemy in the game that did not leave behind HP. It means that the level designers weren't pulling their punches on those foes. How rough! Our date with the third season of Wolfenstein has arrived. This will be my first playthrough of the show. I'm already in love. This game was designed and created by just a 7 man team, and we are about to drop a 12 man game on you! Don't say you weren't warned.
