**# Starting Photoshop**  
**Photoshop enables you**  
**to open several**

---

windows, each one of which contains a desktop workspace called a `_layer_`. You can create layers on top of each other, stack them, and then edit them as though they are layers of the original image.

---

Although you can work in a single Photoshop workspace, the most common use is to create more than one workspace, keeping track of what you've worked on in the previous one and using the layers to keep

---

everything together.

When you open Photoshop and choose File⇒New, you are brought to the New Workspace dialog box shown in Figure 5-9.

This is where you create a new layer to work on. FIGURE 5-9:

---

After creating a new workspace, you can choose whether to choose a new document or use the last one you closed.

This article will give an overview of the basic

---

features of Photoshop Elements, the various elements included in the program, and how to perform a handful of common operations, like color adjustment, canvas photo touchups, and trimming and cropping. Supported

---

File Formats Although Photoshop Elements can open almost any file type you are likely to use, only two formats are officially supported: JPEG and TIFF. Photoshop Elements does not support RAW file

---

formats or raw  
conversion tools.  
Although Photoshop  
Elements does not  
support RAW file  
formats or raw  
conversion tools, it  
offers some basic  
support for them. A  
RAW file converts a

---

digital image file to a file format with a raw representation of the digital data. Photoshop Elements supports the following RAW file formats: CRW/CR2 : Adobe's official RAW format for digital cameras. : Adobe's

---

official RAW format for digital cameras. CRW Lite : QuickTake RAW, Camera Raw, Canon Digital Photo Professional's RAW format. It is very similar to Adobe's RAW format. : QuickTake RAW, Camera Raw, Canon

Digital Photo  
Professional's RAW  
format. It is very similar  
to Adobe's RAW format.  
Canon Digital Photo  
Professional's RAW  
format. It is very similar  
to Adobe's RAW format.  
DNG : RAW format from  
Lightroom. : RAW

format from Lightroom.

NEF : RAW format from

Lightroom. : RAW

format from Lightroom.

SR2: SR2 format.

Photoshop Elements

supports both raw files

and the above RAW

files, but there are

differences between

---

these formats. For example, you cannot edit a RAW file in Photoshop Elements, but you can do everything you can with a JPEG file. Raw files must be converted to the Adobe-compatible RAW format

---

either with Adobe's software or with a third-party converter. A RAW file must be converted to a RAW format to open it in Photoshop Elements. However, you cannot open a RAW file in Photoshop Elements and then

---

save it as a JPEG or  
TIFF. Some RAW  
software programs  
support exporting  
directly from the RAW  
format. Photoshop  
Elements does not  
support this. Using  
RAW in Photoshop  
Elements The Convert

---

to RAW command is used to save files in the RAW format. You cannot open a RAW file in Photoshop Elements and then save it as a JPEG. Instead, you must convert it first. You can perform this conversion at any time with the

Sometimes it takes a long time for you to grow up. That's what they said about R. R. Lee and Charlie Sanders of the Detroit Tigers, who only got their rings in 1968-69.

---

The two were already millionaires when they played their last game on June 6, 1969. What happened Lee had 2,923 hits, with 197 home runs, and an .836 OPS, while Sanders had 1,997 hits with 166 home runs, and a .952

---

OPS. They played a combined 1,477 games and started in a combined 974 games. They hit a combined 1,081 doubles, had 926 runs, 946 stolen bases, and had combined 14,910 at-bats. Each had 689 runs batted in.

---

Lee won two World Series championships, had a batting average of .318, an on-base percentage of .385, and a slugging percentage of .514. His OPS was 1.001. Sanders won one World Series championship, had a

---

batting average of .328, an on-base percentage of .398, a slugging percentage of .512, and an OPS of .986. What took place Lee was the first of the two to get his ring. He was voted MVP for 1968, and finished third in the

---

MVP balloting for the following year. Sanders was named MVP for 1968-69, and led the league in both home runs and doubles. He was voted to the All-Star Game in 1969. Lee was traded on June 30, 1970, to the Atlanta

---

Braves for Jean Faut, a player to be named later, and Don Money. The Tigers moved Lee from first base to third base, where he still plays. Lee's numbers for Atlanta, including his stats in which he led the league in

---

doubles, were: .333  
batting average, 13  
home runs, 74 RBIs,  
and 36 doubles.

Sanders was traded on  
March 4, 1974, to the  
Oakland Athletics for  
Jim Kingman, Mike  
Strahler, and \$70,000  
cash, and José Lind. He

---

plays in the Tigers bullpen, and had a career .289 batting average in 21 major league seasons. His stats were: .306 batting average, 85 home runs, and 396 RBIs. His career OPS was .837. Why it's significant The

---

Tigers were the only team to win the World Series in 1968, Lee's first year with the team, and in 1969, the

**What's New in the Photoshop 2022 ()?**

Woohoo! I'm jumping right in to this project without fear because

---

when I first started reading this I really was excited to see that there would be no more disappointment. The background paper is from Spellbinders Best Yet! Its leaves and the chipboard is from

---

Hobby Lobby! I added a few stickers from the Bird A Canna Flower set and a few of the DSP from this line. I do a lot of layering with the DSP! I'm definitely keeping this, and adding another layer to it - probably adding

---

some washi tape. I added some envelopes that I had in my stash and some label stickers from My Mind's Eye's Label Basics. The sentiment is from Verve's Passionate Pressing. I used a tag shape to make my

---

label. I love how it turned out! It's a challenge to me. I have so much DSP that I don't know what to do with it all. :( Have you ever done a "Blankie" day where you just create using scraps and random pieces of

---

paper? I haven't done one in quite a while. This is my first time. Here is my layout of the day. My idea behind this layout was to make a page really quickly. Instead of sitting down and figuring out a plan, I

---

just threw together this page with scraps, scraps, scraps and it turned out looking a little better than most of the other pages I've done recently. Here are the supplies I used: I LOVE this Mo Manning design team kit! It's

---

been a while since I've used it, so it made me super excited to have it again! (Actually, I don't have this design team kit anymore but I still have the kit from Stampin' Up! I'll post a picture in my next post). Other than the

---

pictures, I haven't really played around with this kit because I've been pretty busy with other things lately - I'm really glad I made this layout. I didn't really have any time to create, so that's why I'm so excited about

---

this one! I really like this kit - it has some really good papers and stamps. The DSP and chipboard are from the Best Yet! line by Spellbinders. I've seen this line all over the place lately. I'm glad I didn't pass on buying

---

the kit and card  
because they have  
great quality paper and  
I'm sure these designs  
will find their way into  
my kits and cards.
