From LucasM: You are now in the middle of a story that continues to unfold in the world of Fate's Edge. A story that will continue, much to the disappointment of all of us. But you will be informed of this very soon. We tried to help the players as much as possible, but as it is impossible to prepare a full lore-doc with such limited time and resources, that's what we did. Don't worry though, we hope to create a full lore-doc and an in-game faction lore-doc with the future updates. That's why we made the track list. We know it's quite short and you might be disappointed in general, but we hope this will give you an idea of what's to come. The list does not represent the full soundtrack, nor is there any order. The fact that we put them in such a way doesn't mean that we don't like the tracks. Each of those tracks represent an important event/component of the game. Length: 3:01:00, audio file format: MP3, overall runtime: 3:24:36, download size: 80 MB, download location: \steamapps\music\ Download this update and don't forget to rate this DLC if you like it. Also ask you friends if they like it. It's always nice to know what people think about this game! Story Trailer: c9d1549cdd
