In recent years, with the increase in the use of portable electronic appliances, such as mobile phones and notebook personal computers, there is an increasing demand for batteries used as power source. Also, the field of application is also

expanding to include power source for electric vehicles and hybrid vehicles and so on. As a power source used for such applications, lithium ion secondary batteries are known. It is preferable that battery electrodes (negative electrodes and positive electrodes) making up a lithium ion secondary battery have a high capacity in order to give a large capacity to a lithium ion secondary battery. As a technique for increasing the capacity of a positive electrode material, there is known a technique in which a positive electrode active material is supported on a current collector. Further, there is proposed, in PTL 1, a positive electrode active material composition capable of releasing lithium ions mainly on the surface of a current collector, and thereby exhibiting a high capacity.

By Steve Gorman SALEM, Mass. (Reuters) - A Massachusetts appeals court on Tuesday ruled that cities cannot force medical marijuana shops to be within their jurisdiction, a decision that sets up a likely legal and political fight if cannabis advocates continue fighting, at least in Massachusetts. The U.S. Court of Appeals for the First Circuit ruled in April that Brookline, a Massachusetts suburb, could not enforce its zoning code against two medical marijuana retailers who had opened in 2010 despite the stores' non-compliance with the suburb's prohibition on marijuana dispensaries. In an unsigned opinion, the court said the Brookline
