An observational longitudinal study of patients treated with anabolic-androgenic steroid products: a report of 12 cases. Anabolic-androgenic steroids (AAS) are often used in an attempt to increase muscle mass, with numerous adverse effects.

More recently, concerns about anabolic steroid products used by both bodybuilders and athletes

for health promotion have raised alarm. This report shows that some AAS products may have severe adverse effects, even if used for short periods. We report our experience with 12 patients who presented with a broad spectrum of adverse effects following AAS use for short periods.

Three syndromes of adverse effects were identified: acne, loss of bone mineral density, and gynecomastia. The first patient had a severe pattern 648931e174

This part shall cover all of the benefits that the Akzidenz font family has to offer, first and foremost the simplicity of usage, then the vast array of

styles and characteristics, and of course, the beauty of the design. The font family is a modern, bold, sans-serif typeface, designed in collaboration with the renowned German graphic designer, Akzidenz Grotesk. Akzidenz Grotesk is the most famous typeface in the world. The same typeface used since the 16th century and the first alphabetical typeface to be called non-Latin. AAT is based on the most famous typeface ever used in writing, providing a bold, modernized version of Akzidenz Grotesk, with modernized optical sizes, a modern ligature, and a plethora of alternate glyphs, such as swashes, or old-style figures. The name Akzidenz Grotesk is derived from the Akademie des Bildes in Berlin-Dahlem, Germany, the center for graphic design research since 1900. The Akademie des Bildes is the world-famous logo for the Akzidenz group of type design. The font family is very suitable for advertising, application title bars, and other utilitarian purposes, but it is also a great choice for highly decorative applications, such as logos and other designs that need a strong, modern typeface that is very legible at small sizes. In general, AAT is a great choice for any kind of application that requires a serious, yet legible, font. Read More

`Q: Removing the first item in the array (Ember.js) I'm iterating through this array. App.Recipes = DS.Model.extend({ name: DS.attr('string'), ingredients: DS.hasMany('App.Ingredient', {async: true}) });`

When I remove an item from the array I need to remove the first item from the array.

`App.Recipe.deleteRecord(recipe.id);` The above deletes the id, I need to remove the entire recipe from the array. I've tried a few things but nothing seems to work.
