## **What's new:**

**Sanctum 2: The Last Stand** is a survival horror video game published by Sanitarium Games and released in North America in the winter of 2007, based on the Sanctum television series. The game features a new storyline with Joseph A. D'Amato, producer and writer of the television series, as the story's main protagonist, who plays as a member of the first-person shooter version of the Sanctum team and is given weapons, items and skills from deceased characters and archetypes. The gameplay of the game is similar to Bioshock in the sense that the player is attempting to survive a major city's zombie apocalypse by finding a safe location in which to resupply and rely on various weapons to defend oneself from zombies. The player also has access to numerous vehicles, for example a horse, which permits an elevated state of mobility. Players can acquire a variety of consumables, such as water and ammunition, by discovering them in their environment throughout the game. Sanctum 2 was developed by Blue Drop Games, and publishes from North American video game major Take Two Interactive. It was released digitally on the PC in North America on October 15, 2007 for Microsoft Windows only, and was released on DVD and retail to GameStop on October 22, 2007. Developed as the final game in the series, it includes characters from the television series, trailers of the game, and a listing of the main cast by name and brief characterization. Additionally, the latest episodes of the series are available as downloadable content. Gameplay Sanctum 2 is a survival horror video game that follows the story of Joseph A. D'Amato, also known as D'Amato, who succeeds in restarting Sanctum 2 along with Joshua Argent, who left the Sanctum 2 team and now is leading a team trying to rescue survivors on a super collider. While the video game is an episodic installment in the franchise, each episode acts as a stand-alone story, and a new episode requires the previous one to have already been completed. Because of this, if the player completes the game before reaching the final episode, they must manually start it from the beginning. The game consists of several chapters. Characters from the two seasons of the television series make an appearance in a cameo role; the major differences between these characters and the
